

HEALTH & WELLNESS BLOG

One of the biggest tools we have to fight health conditions is the power of human connection. This is why awareness is so important! It allows us to share knowledge as well as support each other. Let's remember and be aware of the following national and world health observances:

- Alcohol Awareness
- Autism Awareness
- Child Abuse Prevention
- Facial Protection
- Minority Health
- Oral Cancer
- Sexual Assault Awareness
- STD Awareness and others

We pray that you are also able to remember National Cancer Survivors Day on June 7th. This month is also Men's Health Month.
